EDUCATION

B.Tech

[Radhakrishna Institute of Technology and Engineering](#) Bhubaneswar
- From August 2015 to April 2019

Full stack Development course

[AltCampus](#) Dharamsala, India
- From November 2020 to November 2021

PROJECTS

Expense Tracker

Using Front-End library (Tailwind) and EJS. I use Node JS and Express app on the Back-End side and MongoDB in the database.
Links: [Github](#), [Live](#)

To-Do App

Created a To-Do application in which we can add, edit and delete to-do's using React hooks.
Links: [Github](#), [Live](#)

Alt-Events

Created a static clone of a conference landing page that is responsive and adaptive according to the different screen sizes.
Link: [Github](#), [Live](#)

live-code-editor

Using an external library like codemirror, react-codemirror2 to implement code editor-like UI. It has three sections HTML, CSS, and OUTPUT.
