 Twitter

## EDUCATION

**Full Stack Web Development**
AltCampus Dharamsala, India
- From November 2020 to November 2021

**B.Tech CSE**
Radhakrishna Institute of Technology and Engineering Bhubaneshwar
- From August 2015 to April 2019

## PROJECTS

**Expense Tracker**

Using Front-End library (Tailwind) and EJS. I use Node JS and Express app on the Back-End side and MongoDB in the database.
Links: Github, Live

**To-Do App**

Created a To-Do application in which we can add, edit and delete to-do's using React hooks.
Links: Github, Live

**Alt-Events**

Created a static clone of a conference landing page that is responsive and adaptive according to the different screen sizes.
Link: Github, Live

**live-code-editor**

Using an external library like codemirror, react-codemirror2 to implement code editor-like UI. It has three sections HTML, CSS, and OUTPUT.
Links: Github, Live

**GOT**

Created a dynamic web page of Game of Thrones using DOM manipulation. Added tags on the top with the name of the houses.
Link: Github, Live

**Blog App**

Created a client-side blog application that fetches data from an API and displays content accordingly using ReactJS, API, JavaScript, HTML, CSS.
